

## HANGERS & HINGES FASTENING MACHINES

Cassese offers two very reliable hangers and hinges fastening machines for all budgets and type of customers, from craftsmen to contract framers.

### MF 20

A solid pneumatic machine designed to fasten hangers and hinges for strut backs.

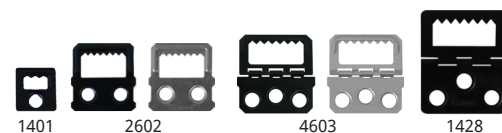

- Very competitive price
- Quick change of hangers' or hinges' adaptors
- Ideal for small and medium sized contract framers

### MF 40

A very productive coil-fed machine ideal for contract framers and mass production.

- Very solid cast iron base and fastening system
- Extremely fast (fastening activated by a sensor)
- Can fix 1-hole hangers, 2-hole hangers and 3-hole hinged hangers
- Quick switch from 1 hanger type to another
- 2 measure stops for setting quickly short and long sizes
